DRINKING WATER PROBLEM CORRECTED

Customers of Moundsville Water Brd. were notified on 08/07/19 of a problem with our drinking water and were advised to boil all water used for drinking/other activities for 48 hours. We are pleased to report that the problem has been corrected and it is no longer necessary to boil all water used for drinking/other activities for 48 hours. We apologize for any inconvenience and thank you for your patience during this issue.

The areas that are affected are as follows:

- Entire Water System
- or
- Clive Avenue from Fourth Street to Dexter Avenue in Moundsville, West Virginia.

A construction crew performed a tie-in of a new replacement main water line into the existing main water line at Clive Avenue on Eastern Fourth Street. This had affected 20 customers on Clive Avenue only. The tie-in was completed and water service was returned to all customers. The customers affected were notified through news media and social media of the boil order. We have received word from the lab in Wheeling that the Coliform/Bacti sample has passed. The boil order is LIFTED.

As always, you may contact Terry Roberts at 304-280-3725 or P.O. Box 480, Moundsville, WV 26041

with any comments or questions.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
